Django

## PERSONAL PROJECTS

### Chat Forum (09/2022 - 09/2022)

- Developed a personalized chat application that enables users to create chat rooms and join existing ones after authentication
- Implemented Redux to efficiently manage application states, ensuring a seamless user experience with minimal data processing delays.
- Integrated Firebase for authentication, while providing a username display feature on hover for user engagement.
- Facilitated multimedia communication by enabling users to send and receive images and videos, enhancing the application's versatility and user engagement.

### Dsa Tracker (06/2022 - 06/2022)

- Developed a DSA tracking website with organized links categorized by topic and implemented a modular approach.
- Designed and structured the website to ensure responsive and user-friendly navigation, enhancing the overall user experience.
- Implemented a checkbox feature to enable users to mark problems as solved or pending..
- Utilized Tailwind CSS properties to customize and optimize the visual presentation of problem cards.
